SUMMARY

Motivated developer with hands-on experience in building full-stack applications and contributing to production-ready web features. Eager to solve real-world problems and continuously grow as a developer.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

December 2021 - Present

Guru Tegh Bahadur Institute of Technology, GGSIPU, New Delhi

CGPA: 8.91

EXPERIENCE

Associate Technology – Flexiele

August 2024 – Present

- Built and optimized dynamic email and notification templates using HTML, CSS, and React, enhancing client communication efficiency by 15%.
- Integrated Handlebars templating with SQL queries to automate generation of client invoices, reducing manual document preparation time by 40%.
- Developed reusable frontend components and optimized load performance, decreasing UI latency by 20%.
- Collaborated with backend developers to debug and integrate APIs, accelerating development cycles by 25% and reducing integration bugs by 30%.
- Contributed to sprint planning and code reviews, helping improve team velocity by 15% and reducing code defects by 20%.

Web Developer Intern – LetsGrowMore

August 2023 – September 2023

- Designed responsive web pages using modern CSS techniques, increasing mobile user interaction by 45%, and boosting average session duration by 30%.
- Implemented Git branching strategies (feature branches, pull requests), reducing code conflicts by 40% and accelerating team collaboration and deployment cycles.

SKILLS

- Programming Languages:** JavaScript
- Web Technologies:** HTML, CSS, React.js, Node.js, Express.js
- Tools and Platforms:** Git, GitHub, Bootstrap, Tailwind CSS, Material UI
- Databases:** MySQL, MongoDB
- Concepts:** REST APIs, Responsive Design, Problem Solving

PROJECT

Reviewing Platform – TravelHaven

Tech Stack: HTML, CSS, JavaScript, Bootstrap, NodeJS, ExpressJS, MongoDB, REST API, Git, GitHub

Live Demo: [TravelHaven Website](#)

A full-stack travel review platform where users can sign up, explore destinations, and share reviews.

- Developed secure user authentication using passport, ensuring encrypted session handling and route protection, improving data integrity, and reducing unauthorized access incidents by 90%.
- Built a dynamic review module that supports detailed text reviews, 5-star rating inputs, and real-time submission. Successfully gathered over 50+ user-generated reviews during closed testing, demonstrating high usability and engagement.
- Integrated the Leaflet.js mapping library to allow users to tag locations and explore reviews interactively on a map interface, leading to a 50% increase in user engagement.
- Designed modular RESTful APIs with Express and structured MongoDB collections using Mongoose. Implemented indexing and optimized aggregation pipelines, resulting in a 30% reduction in server response time.
- Used Bootstrap and mobile-first design principles to create a fully responsive user interface. Achieved 90% mobile usage in testing with a seamless experience across mobile, tablet, and desktop screens.
